## GENDER EQUALITY

Prof. Sandhya J. Mane

Dept. Of Political Science

Chandrabai Shantappa Shendure, College,

Hupari., Kolhapur.

**Introduction :**

In the natural concept human beings are also considered as animal but with a different with the help of the wit he has got, he made self - development. He established his position through rites, education, bonds social rules etc. Naturally like other creature in the nature the genders male and female exist human Societies also. Of course the male female difference is followed as per the natural rules in other creatures. As per as human beings are considered there is also a different between male and female but it inspired either with positive or negative approaches. The positive approach of equality seems to be very low in human society. In the negative approach woman is considered subordinate to man in the health wit and strength respectively. Gender based non equality is seen largely in the society. Thus it is badly needed to convert or change it into the equality.

**Objectives:-**

- To find out the causes of un equality
- To study the essential aspects for equality
- To know the constitutional provisions regarding the male- female equality.

**Research Methodology -**

Various reference books, journals News Papers, Internet etc. reference have been used as the resource material for the present research paper.

**Topic Presentation -**

Except the natural Phenomenon differences, being human being equality should be maintained in every respect. But, it doesn't happen like that. There are several reasons behind it they are as following.

**Physical and psychological Attitude -**

Physically men are stronger than women and normally stronger establishes his power upon the weaker. Similarly the men have weakened the women by supposing them the sub-ordinate element. Even the situation is not different in today's modern and learned society. The thought is repeated again that woman is inferior to man in every respect.

**Social Approach -**

In the male- dominated society woman is considered a sub- ordinate element. Baby daughters are killed in the wombs. Being just a girl, she is refused education. She is contempt in her own family. She is forced to get married before maturity. Even there as a social custom she is exploited her dowry or she is sold out. Many times her physical and psychological harassment become habituated to her. The social attitude towards widows and divorced women is so harmful. The thought of re-marriage for those women is generally rejected. But it doesn't happen with men, they are allowed multi - marriages, in the public places women are tortured and harassed, raped, attacked with acid, they are murdered in a large manner. In the male dominated society women is nothing but a thing of using. These kinds of attitudes defame devalue the women.

**Economical Attitude**

As mentioned above women are considered a thing of using. In today world after completing education, women get involved themselves in some jobs. But even an her own earnings are out of her rights. Her family members or her husband right and claim on her salary. As well as the places where she works, are not usually safe for her.

**Political Attitude**

Now- a-days women educated improved herself as an aspect of equality she participated in politics also many times it is seen that women is used for reserved political seats. Once she gets elected, she is limited just of an impression of finger or sign. Otherwise her husband or other male make their dominance own her seat. So she is helpless to enjoy the political field also.

**Religious and Traditional Attitudes**

According to the lines given in Manusmirti of Hindu religion. Women are not worthy for liberty. Even Muslim religion considers the women as subordinate element. Social and religious traditions have been restricting and exploiting the women. In today's globalization world women are crossing the restrictions; they are trying to prove themselves. But even here they are unsafe. Their harassment directly or indirectly is increasing day by day. From family to public place and from a house wife to a lady officer it is very difficult and hard to maintain self dignity and security. In this way globalization affecting the women in negative way. In this way gender based inequality has been deeply rested in the society. However now-a-days women are seen at some extent enjoying liberty and equality, doing jobs and various posts almost in every field. In order to develop and improve them and to create gender based equality there are some things to be studied and understand

#### To Change Male Mentality

In order to bring the gender equality it is strongly needed to change among the men's psychology in the male- dominated society. They should give up to think that women is subordinate and should accept her calibers and equality

#### Spreading Education

Education can bring the positive changes. Thus by education the women confidence and ambitions must be created among women. Only education can change the image and identity of women. So different kinds of educational / Schemes and camps should be organized.

#### To be Acquainted with Science and Laws. -

According to the Science it is male who remains responsible for the birth of a girl. These kinds of scientific thoughts must be spread into the society which will help to remove the misunderstandings. Similarly Society must be acquainted with the different acts and laws that have been passed against the harassment and exploitation of women.

#### Women should increase confidence -

Women had been restricted; they had been rejected even from their fundamental rights for many years. Thus it habituated with her to remain neglected and to live as a subordinate element. She takes herself as an inferior object. Now it is needed that women should strengthen themselves, and make herself as a confident person. She should suppose herself equal to man. Then and then only can be made.

#### Government Plays vital Role -

Government makes rules and passes law and Acts and also implements it. But it is necessary to reach these governmental activities up to the everyone in the society. The government plays a vital role to aware the society about the various acts and laws against the harassment of women. In this ways in order to create gender based equality the above mentioned points are to be studied. Indian constitution contains different Acts about this gender equality: Mahatma Jotirao Phule, Rajashri Chhtrapati Shahu Maharaj The Architect of Indian Constitution Dr. Babasaheb Ambedkar preferred the principle of male - female equality and worked. Accordingly Dr. Babasaheb Ambedkar has made the strong provision in the constitution for the above mentioned point. In the third part of Indian Constitution, Acts 12 to 35 Mention the fundamental rights. The constitution prefers male-female equality
